EMPOWERING INQUISITIVE MINDS

What I want to be when I grow up ...

By Scarlett Sedek, age 8

When I grow up I want to be an astronaut. I want to be an astronaut because I want to see Earth from high up. It will be cool to float in space and eat frozen dried ice cream. I would like to go to the moon and that would take 3 days in a rocket ship. A rocket ship goes 17300 m/h. My favorite planet is Neptune. On Neptune it rains diamonds because the clouds release hydrogen into the air.

Astronauts live on the International Space Station and they perform a lot of interesting experiments in zero gravity. They also repair the space station by doing "space walks" which means they float in outer space attached to the ship. I think I would really like to do that. My favorite astronaut is Sally Ride. She became the first American woman in space in 1983. She was also the youngest. One of her quotes is "The stars don't look bigger, but they do look brighter." To be an astronaut, I will have to study really hard and be very good at Science and Math.

What I want to be when I grow up

By April Chan, age 7

My name is April and I am 7 years old. When I grow up, I want to be a doctor. I want to be like Elizabeth Blackwell because she was the first woman in America to receive a medical degree. Also, she encouraged women to go to the medical profession. She opened her own medical college for women. A quote from her is that "if society will not admit women's free development, then society must be remodeled." I want to be an independent female doctor just like Elizabeth Blackwell.

When I grow up ...

By Ebrahim Abdoush, age 6

When I grow up, I want to be a poet because it is good writing. My favorite poet is Dr. Seuss. A second reason is because he has a lot of poems. A third reason is Dr. Seuss has different poems. My favorite quote is "The more that you read, the more things you will know. The more that you learn, the more places you'll go."

What I want to be when I grow up

By Eshaan Chandra, age 7

When I grow up, I would like to be an inventor and an orthopedic surgeon because I want to help people and create new inventions for the people. The invention of the microwave was very cool and inspired me the most. Percy Spencer was a self-taught engineer who invented the first microwave oven.

One day he noticed that a candy bar in his pocket started to melt.

The radar set that he was working on transmitted micro waves which was cooking the candy bar! Spencer figured out that the microwaves could be concentrated to heat food and that was when he created the first working microwave oven. And guess what was the first food he cooked? It was popcorn! It was huge and expensive. It took many years to produce smaller size and inexpensive microwaves. Today, almost every kitchen has a microwave. I think it is a wonderful invention because it is very convenient and it heats up food quickly. Even kids can use it!

To improve on this invention, I have an idea to make it smaller, so that it is portable and make it solar powered as well. This way people can carry it anywhere they want, even where there is no electricity.

Another person who inspired me the most is the first orthopedic surgeon, Dr. Jean Andre' Venel. He inspires me because he was a great man who opened the first children's hospital for the disabled children with deformed bones. He invented a lot of different things as well, for example; braces for club feet, the first orthopedic bed and the brace for the deviated spine.

I would like to help people and bring smiles on their faces, and give them a quality life. For example, fixing their leg bones or doing knee surgeries so a person can walk again. I would also like to research and come up with new inventions to help people.

Poem: AlphanewZ Beats All

By Emad Ahmed, age 11

AlphanewZ might be new,
but they have the best crew.

Students of all ages
participate even though
they have no wages.

Savanna, Ethan Lallana, Hannah,
Savannah and even Little Ms. Banana
The 1st edition had me and Morgan Clarke
I think some kids even wrote about sharks

Every week we write something new.
Mrs. Jessie picks the best that doesn't
say "Moo."
Most of the news companies distribute
some fake news

So they might get some boos
Hopefully AlphanewZ will never get a boo,
ABC beats NBC and Fox rocks against CNN
In conclusion AlphanewZ beats all crews!
